**PERSONAL SUMMARY**

A knowledge seeker and enthusiastic individual who believes in learning and implementing is the key, pursuing specialized course of MCA (Information security management services) with an average score of 7.16 out of 10. Highly interested in developing IoT related devices. Eventual career goal is to become a fully-qualified and experienced IoT developer and application security developer, with the longer-term goal of moving into project management. Socializing is one of my hobby I acquired through the time .I am an energetic and enthusiastic person who enjoys doing something which can create an impact on the society. My present career aim is to work within IT startup because I hope to learn more as learning is a never ending process. The opportunity to learn new skills and work with new technologies is particularly attractive to me.
